HOW TO GET COPIES OF INDEXED ARTICLES

Back volumes of "The Camera Craftsman" are available in microfilm editions from Xerox University Microfilms. Write directly to them at 300 North Zeeb Road, Ann Arbor, Michigan 48106 for cost and ordering information.

Complete copies of 1975 (Volume 21) "The Camera Craftsman" can be obtained from the publisher for \$1.00 each bi-monthly issue, while supplies last. Specify volume, number, months and quantity when ordering, e.g., "Volume 21, #3, May/June, one copy."

Photocopies of specific articles listed in the Index may also be obtained at 25¢ per page. The picture clarity of these copies cannot be guaranteed, however. Include all data from the index line when ordering photocopies. For back issues of volume 21 or any photocopies you might like, write to "Camera Craftsman," 2000 West Union Ave., Englewood, Colo. 80110.

National Camera Announces Workshops and Seminars for '76

AREA WORKSHOPS

Continuing support from camera manufacturers and camera repairmen has made it possible for National Camera to offer its Area Workshops in five major cities in 1976. This is the 14th consecutive year for the National Camera field training program.

Each 3-day workshop offers in-depth, hands-on training with equipment provided by the manufacturers. Technicians are guided in their study, at basic or advanced level, by two or more of America's foremost camera repair instructors.

Current service information, continuously being developed at National Camera, is compiled and prepared for efficient dissemination at the workshops. Modern test equipment is demonstrated and explained in detail.

All of this intensive training is supplemented by lectures, shop talk with other repairmen from the area, and coordinated photo workbooks which are kept by the participants for a permanent record of the topics covered at the session. A framed certificate is awarded upon completion.

The schedule for workshops is San Francisco ... April 28-30; Detroit ... June 24-26; Hartford, CT ... June 28-30; Albuquerque ... November 4-6; Atlanta ... November 8-10.

SEMINARS IN COLORADO

Three 2-week seminars will be held this year at National Camera Headquarters in Englewood, near Denver, Colorado. Seminar dates are July 12-23, August 9-20, and September 13-24.

The first week of each seminar comprises Business Methods, Testing Procedures, Servicing Methods, Photographic Electronics, and an Idea Exchange among the participants.

During the second week, all participants work under the guidance of the instructors at the bench. They learn new equipment, procedures, test equipment methods, and improve their skills while enjoying the company of other technicians who also have things to share. All technicians, whether skilled or beginners, will find the seminars of value to them and their business.

Participants may choose to attend only the first week, only the second week, or both, but the entire course is recommended for the most valuable training experience. Graduates of National Camera may attend one seminar after graduation, with no additional tuition charge.

For further information, write National Camera, 2000 West Union Avenue, Englewood, Colorado 80110, specifying Area Workshops or Seminar information.
